PROFESSIONAL SUMMARY

Networking and Cybersecurity-focused IT professional with hands-on experience in network infrastructure, system administration, and security operations. Skilled in VLAN segmentation, VPN deployment, threat detection, and endpoint troubleshooting. Proven ability to design and secure lab environments using zero-trust principles while supporting real-world hardware and network environments.

CORE SKILLS

Networking: TCP/IP, DNS, DHCP, VLANs, NAT, Routing & Switching, VPN (WireGuard, OpenVPN)

Security: SIEM (Splunk, Elastic), Snort, Suricata, Nessus/OpenVAS, Firewall Configuration, Incident Response

Systems: Linux (Ubuntu), Windows Server (AD, GPO), Virtualization (VMware, Hyper-V)
Tools: Wireshark, PowerShell, Bash, Network Troubleshooting, Documentation

PROJECTS

Home Lab — Network & Security Infrastructure

- Built segmented VLAN network with zero-trust design
- Configured VPN (WireGuard) for secure remote access
- Deployed firewall, DHCP/DNS, and NAS services
- Implemented monitoring and logging solutions

Penetration Testing Lab — Kali Linux & Metasploitable

- Built an isolated virtual lab environment using **Kali Linux** and **Metasploitable** virtual machines
- Conducted vulnerability scanning and enumeration to identify exploitable services
- Utilized the Metasploit Framework to exploit known vulnerabilities in a controlled environment
- Established controlled remote access to target system to demonstrate post-exploitation techniques
- Analyzed system vulnerabilities and documented findings for remediation and security improvement

Active Directory Lab

- Built Windows Server domain environment with AD, DNS, DHCP
- Configured Group Policy and domain authentication testing

EXPERIENCE

All Lines Technology — IT Break/Fix Technician (2026–Present)

- Diagnose and repair hardware issues across client devices
- Harden and optimize endpoints to improve security posture
- Perform break/fix support, resolving critical failures
- Install OS and enterprise software configurations

Butler County Community College — IT Intern (2025)

- Supported campus IT operations including endpoint troubleshooting and deployment
- Deployed Intel EMA for remote pre-boot system management
- Assisted with network troubleshooting and system imaging

IATSE Local 489 — Studio Mechanic (2025–Present)

- Collaborated with team members to plan and execute complex production setups under tight deadlines
- Contributed to efficient problem-solving and task completion within a team-based setting

St. Moritz Security — Security Officer (2023–2025)

- Monitored security systems and documented incidents
- Applied risk mitigation and situational awareness practices

EDUCATION

AAS – Networking & Cybersecurity, Butler County Community College (GPA: 3.6)

B.S. – Criminology & Criminal Justice (In Progress), Slippery Rock University
